

MEMORANDUM

Date: October 25, 2011

To: The Honorable Chairman and Members
Pima County Board of Supervisors

From: C.H. Huckelberry
County Administrator 

Re: **Creating and Sustaining Construction Employment within Pima County**

Attached please find a summary of construction job creation or sustained construction employment from the beginning of the great recession of 2008. The construction sector has been the hardest hit regarding employment losses.

As economic conditions deteriorated, Pima County began to accelerate the authorized bond Capital Improvement Program (CIP) to implement projects that were promised to the voters. As a result, the County realized significant cost savings due to the competitive construction market and created and sustained construction employment.

As you can see, contracted construction for all CIP projects in the County since 2006 is over \$794 million, and this investment has created or sustained nearly 12,000 construction employment jobs. Through voter authorized bond capital investments, we have been able to make to develop and deliver important capital improvement projects for the public as well as create and sustain construction employment during this difficult economic period.

CHH/mjk
