Via email to Neva Connolly:

Neva,

I am reading through the Draft MSCP. One item that struck me as odd was Table B2 on pages A11 – A15. This table is a copy of a spreadsheet I maintain within PDOT for all our 404 related project files. It goes back approximately 20 years and tracks largely those projects where 404 permits process was initiated and just tracks the status and location of the files more than anything. Some are only JDs or are not 404 related at all based on JD determinations. I am **unsure** how this spreadsheet made it into the MSCP as Locations for Future Maintenance Activities. I would think that RFCD would have a gigantic list of maintenance locations that dwarfs this permit tracking spreadsheet. Anyways, just an FYI...
