Arizona-New Mexico Territories - post 1864

Introduction

Early maps have long served an important role in evaluations of cultural resource potential in Pima County. The depiction of a historical-period property on an early map, whether a house, a ranch, a mining prospect, or an irrigation canal, is often the earliest (and sometimes the only) evidence that cultural features once existed in a particular place. Unfortunately, the use of early maps for cultural resource evaluations in the county has always been piecemeal in its coverage, an understandable result of the need to evaluate the impacts of scattered individual development projects. Although individual projects have benefitted greatly from narrowly defined map research efforts, the potential of early maps as a source of information for county-wide preservation planning has never been adequately explored.

At Pima County's request, Statistical Research has begun an effort to use early maps as a regional preservation-planning tool by systematically examining a group of early maps of the county for depictions of cultural features. Examination of the maps has consisted of recording the name, location, and other information provided for every cultural feature depicted within the current bounds of Pima County (with a few exceptions; see below), then entering the information into a series of tables. The completed tables have allowed for a comparison of the contents of the various maps, and for the creation of a typology of cultural resource sites based on the overall range of depicted sites. The typology will be used to plot the sites, distinguished by type, on a single map (or possibly on a series of maps). The resulting map (or maps) will be digitized by Pima County and incorporated into its GIS database.

Discussion of the Source Maps

The maps examined by Statistical Research are: the *Official Map of Pima County, Arizona*, prepared by George J. Roskruge and published in 1893; four 1:125,000-scale USGS maps of portions of eastern Pima County, dating to the period 1904–1915; and 30 1:62,500-scale (15'-series) USGS maps of portions of eastern Pima County, dating to the period 1942–1963. The characteristics and coverage of the Roskruge map and the two groups of USGS maps are discussed in turn below. Because the Roskruge map and the two groups of USGS maps offer three chronologically discrete views of cultural resources, we present the information gathered from the three periods in separate tables.

Official Map of Pima County, Arizona (Roskruge Map of 1893)

The 1893 Roskruge map is the earliest detailed map of Pima County in its entirety and is a major source of information on the location and distribution of historical-period cultural resources, including roads, trails, rail lines, towns, Native American settlements, ranches, mines, and private landholdings. Produced at a scale of about 1:207,000 (1 inch equals approximately 3.25 miles), the map includes township and range lines throughout, as well as section lines in surveyed areas.

The map has a few peculiarities worth noting. First, place names on the map are often misspelled, sometimes badly. We preserve the map spelling in every case in our tables. Second, many places indicated on the map are given only a proper name (e.g., Mariscal), with no indication whether a town, ranch, private residence, or some other feature is represented. For example, numerous places labeled with proper names on the map were presumably ranches, yet only 14 places include the word "ranch" (or "rancho") in their names. In our table, we have avoided guessing the nature of sites lacking specific labels and so have not assigned type designations to any of the sites. Third, although the map does have the virtue of indicating the locations of most named features with a small black square or another distinctive symbol, the number of buildings or features that existed at a given place is not represented.

The one possible exception is Native American settlements, which are sometimes depicted as groups of stylized Native American dwellings, but it is uncertain that these groups represent actual numbers of dwellings. Unlike for the later USGS maps, we have not provided building counts in our tables for this map. Fourth, the map depicts the extent of Pima County in 1893, prior to the creation of Santa Cruz County from the southeastern corner of Pima County in 1899 (Walker and Bufkin 1986:32). We have not included any site outside the current bounds of Pima County in our tables for this map. Finally, although the coverage of the later USGS maps we consulted is restricted to eastern Pima County, we have included all of the current extent of the county in our review of this map.

The data compiled from the Roskruge map are presented in Tables 1 and 2, which differ only in the way the data are sorted. Table 1 sorts the sites by name (or label); Table 2 sorts the sites by township and range.

USGS 1:125,000-Scale Maps

We examined four early USGS 1:125,000-scale topographic maps of contiguous portions of eastern Pima County. The map quadrangle names and years of publication are Benson (1915), Patagonia (1904), Tucson (1905), and Winkelman (1913). Figure 1 indicates the Pima County coverage of the four quadrangles. Of the four, only the Tucson quadrangle falls completely within Pima County. Only the approximate northern half of the Patagonia quadrangle, a narrow strip in the northwestern portion of the Benson quadrangle, and an even narrower strip on the south edge of the Winkelman quadrangle fall within Pima County (our examination did not extend beyond the county boundaries). No cultural features were depicted in the small portion of Pima County that falls on the Winkelman quadrangle. We also examined a 1947 reprint of the 1905 Tucson map, which differs in minor ways from the original version; we have noted relevant differences in the corresponding tables. Other USGS 1:125,000-scale maps may exist for other portions of Pima County, but they were unavailable either in the University of Arizona (UA) Library map collection or at the Arizona Historical Society (AHS) Library.

The data compiled from the 1:125,000 maps are presented in Tables 3–6, which differ only in the way the data are sorted. Table 3 sorts the sites by type, Table 4 sorts the sites by name (or label), Table 5 sorts the sites by map name, and Table 6 sorts the sites by township and range.

USGS 1:62,500-Scale (15'-Series) Maps

We examined 30 topographic maps in the USGS 1:62,500-scale (15') series. Figure 2 indicates the Pima County coverage of these maps. With two minor exceptions, we were able to examine all of eastern Pima County (all nonreservation lands east of Range 5 East) with maps in this series. We were unable to locate copies of the Tortolita Mountains and Benson quadrangles, which include small pieces of Pima County (the portion on the Benson 1:62,500-scale quadrangle is covered by the earlier 1:125,000-scale Benson quadrangle). The dates of the 30 quadrangles vary considerably (see Figure 2), but all fall within the period 1942–1963. Some quadrangles either were not mapped until relatively late or their earlier editions were not available at AHS or UA. If more than one version of a quadrangle was available, we generally chose the earlier one, although the difference was occasionally only a few years. It should be noted that there are a number of USGS 1:24,000-scale (7.5'-series) maps of eastern Pima County with dates in a similar range. We decided not to examine these maps both for a lack of time and because of the discontinuous coverage they provided. A later effort to include these maps, as well as all earlier versions of the 1:62,500-scale maps, would undoubtedly be worthwhile.

Four of the 30 maps examined, the Eloy, Galiuro Mountains, Red Rock, and San Vicente quadrangles, all

having only small pieces of Pima County, did not depict any sites within county limits. Therefore no entry for any of these four quadrangles appears in the tables.

The data compiled from the 1:162,500 maps are presented in Tables 7–10, which differ only in the way the data are sorted. Table 7 sorts the sites by type, Table 8 sorts the sites by name (or label), Table 9 sorts the sites by map name, and Table 10 sorts the sites by township and range.

A Note on Sites Falling on Reservation Lands

In our review of both the 1:125,000-scale maps and the 1:64,000-scale maps, we did not include any sites that fell within the main portion of the Tohono-O'odham Nation as currently delimited. However, we did include the limited number of sites that fall within the currently defined San Xavier District of the Tohono-O'odham Nation. In each case, the comments column of the relevant table notes the location of the site within current reservation bounds. For the 1893 Roskruge map, we include all sites regardless of location and without comment in the tables.

Locational and Other Information in the Tables

All of the maps examined predate the use of UTM grid lines, so the locations of individual sites were recorded with reference to township, range, and section. The smallest subdivision recorded for an individual site was the quarter section, for two reasons. First, numerous places named on the maps are not accompanied by symbols indicating their precise locations; the quarter section was generally as precise as we could be. Second, even when a place-name is accompanied by a symbol or depiction, the scale of the maps makes calculating smaller subdivisions too time-consuming. Occasionally, an area represented on a map had not yet been surveyed by the General Land Office when the map was made. When a site falls within such an area, we provide distances in kilometers to the nearest surveyed area, or to landmarks on the map.

On all maps but the 1893 Roskruge map, individual buildings are often represented. When it is possible to discern individual buildings, we have provided a count of them, although the apparent absence of buildings at a site is probably not a reliable indicator that no buildings were present. Other than a name and a physical depiction or symbol indicating its location, most sites we recorded were not accompanied by any other information. We do provide the occasional explanatory or descriptive comment in the tables when some ambiguity in the name, depiction, or locational information calls for it.

Site Typology

The site typology derived from the map data consists of lumping sites of obviously related function. Assigning a letter to each type and including the letters in the tables allows us to more easily sort the information we compiled. As already noted, because of difficulties in determining function for many of the sites on the 1893 Roskruge map, we have not assigned type designations to any of the sites on that map.

The types with their letter designations are:

A: town, city, or railroad stop
B: camp (any location labeled "camp," including prison camp, CCC camp, Boy or Girl Scout camp)

C: cemetery or grave
D: house, cabin, or any isolated structure not included in another designation
E: church or similar feature
F: farm, dairy, or agricultural operation
G: medical facility (sanitarium, preventorium, hospital)
L: landing field, airport, or related feature (excluding military installation or feature)
M: mine or mining-related feature (including test hole and gravel pit)
N: ranger station, fire station, guard station, or scientific station
O: other miscellaneous feature (drive-in theater, "gaging" station, etc.)
P: park, picnic area, or recreational area (including athletic field, gun club, country club)
R: ranch, land grant, or ranch-related feature (excluding water-storage or water-control feature)
S: school or any other academic facility (academy, university, novitiate)
T: tank (presumably, an excavated or natural feature)
U: water tank (presumably, an aboveground storage tank)
V: dam, reservoir, or miscellaneous water-control feature (siphon, pump, canal)
W: well or windmill
X: military installation or feature
Z: transportation-related feature (excluding railroad stop)

Cultural Features Not Included in the Site Tables

A fairly large number of cultural features (or features with cultural associations) that appear on the maps do not appear in the tables. These are: topographical features (named or unnamed, including streams and springs), unnamed mines and prospects, sewage-disposal features, pipelines, benchmarks, cuts, unnamed tanks, levees, and unnamed buildings (or what appear to be buildings) in unnamed areas. Also, because it is difficult to record and present locational information for linear features, the tables do not include roads, trails, railroads, or other extended linear features. A separate table providing names and general locational information for these features is being prepared.

Montejo	T13S, R14E	
Montezuma Mines	T17S, R6W	

Table 1 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Name

Property Name	Location	Comments
Moraga	T12S, R18E	
Moreno	T17S, R13E	
Moresco	T13S, R17E	
Mowepa	T13S, R2E	
Moyza	T20S, R11E	
Mueller	T14S, R14E	
N. Telles	T15S, R16E	1 of 3 Telles properties within 2 miles of each other
New Ranch	T18S, R13E	
Nine Mile Water Hole	T13S, R12E	
Nutter	T17S, R14E	
Old Aribac	T21S, R10E	
Old station	T18S, R17E	
Omboa smelter	T18S, R15E	
Ortiz	T19S, R13E	
Otero	T18S, R8E	
Otero	T22S, R9E	
Oury	T14S, R15E	
Oury	T18S, R11E	
O'Brien	T17S, R14E	
O'Leary	T17S, R18E	
P. Carrillo	T13S, R17E	
P. Romero	T13S, R14E	1 of 2 Romero properties within 0.5 miles of each other
P. Van Alstine	T14S, R16E	1 of 3 Van Alstine properties within 0.5 miles of each other
Pacho	T12S, R18E	1 of 2 Pacho properties within 0.5 miles of each other

Table 1 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Name

Property Name	Location	Comments
Pacho	T12S, R18E	1 of 2 Pacho properties within 0.5 miles of each other
Pantano Ranch	T17S, R17E	
Pantano Station	T16S, R17E	along Southern Pacific Railroad
Papago	T19S, R11E	
Papago Chief Camp	T14S, R2E	
Papago Indian Reservation	T16S, R12E	15 miles E/W by 7 miles N/S; plus T15S, R13E, Secs. 22–24, and E ½ of Secs. 9 & 16
Papalote	T21S, R11E	
Patton	T11S, R18E	
Pelton	T12S, R8E	
Perry	T22S, R10E	
Person	T14S, R18E	
Pima Mining Co.	T15S, R5E	
Piri	T14S, R15E	
Plummer	T13S, R14E	
Poso Blanco	T14S, R1E	
Poso Buena	T18S, R9E	
Poso Nueva	T19S, R9E	
Powder	T14S, R13E	
Prince	T13S, R13E	
Prince	T13S, R13E	
Prince	T13S, R13E	
Proctor	T19S, R15E	
Puerte Cito	T21S, R8E	
Pump house & well	T16S, R3E	
Pusch	T13S, R13E	
Quijotoa	T16S, R2E

Shortridge	T16S, R14E	1 of 2 Shortridge properties within 1 mile of each other
Steinfeld	T16S, R14E	
Weigle	T16S, R14E	
Riley's well	T16S, R15E	noted as "dry"
Railroad tank	T16S, R16E	
Vails	T16S, R16E	apparently a stop along Southern Pacific Railroad
Brady	T16S, R17E	
Corbett	T16S, R17E	
Pantano Station	T16S, R17E	along Southern Pacific Railroad
Circle H Ranch	T16S, R18E	
Artesa	T17S, R5E	
Indian village	T17S, R5E	
Fresnal Ranch	T17S, R6E	
Montezuma Mines	T17S, R6W	
Well	T17S, R6E	
El Moro	T17S, R7E	
Ventana	T17S, R7E	
Minerva	T17S, R8E	
Warren	T17S, R8E	
Anvil Ranch	T17S, R9E	
Stevens	T17S, R10E	
Corrillo	T17S, R11E	
Jenkin	T17S, R11E	
Matilda	T17S, R11E	
Santa Maria	T17S, R11E	
Segunda	T17S, R11E	

Table 2 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Township and Range

Property Name	Location	Comments
Soto	T17S, R11E	
Tacore	T17S, R11E	
Banes	T17S, R12E	
Buckalew	T17S, R12E	
Copda	T17S, R12E	
Doyle	T17S, R12E	
Elliot	T17S, R12E	
Fries	T17S, R12E	
Goldman	T17S, R12E	
Mineral Hill Camp	T17S, R12E	
Ricardo	T17S, R12E	
San Xavier Mine	T17S, R12E	
Well	T17S, R12E	
Buehman	T17S, R13E	
Doyle	T17S, R13E	
Durazo	T17S, R13E	
G. Morales	T17S, R13E	
Hoffman's Camp	T17S, R13E	
J. K. Brown	T17S, R13E	
Moreno	T17S, R13E	
S. E. Brown	T17S, R13E	
Smelter	T17S, R13E	
Brown's reservoir	T17S, R14E	
Hartt	T17S, R14E	1 of 3 Hartt properties within 1.75 miles of each other
Hartt	T17S, R14E	1 of 3 Hartt properties within 1.75 miles of each other
Hartt	T17S, R14E	1 of 3 Hartt properties within 1.75 miles of each other

Table 2 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Township and Range

Property Name	Location	Comments
Hartt's reservoir	T17S, R14E	
Nutter	T17S, R14E	
O'Brien	T17S, R14E	
Well	T17S, R14E	
Andrade	T17S, R17E	
Bobo	T17S, R17E	
Hopley	T17S, R17E	
Mescal	T17S, R17E	
Pantano Ranch	T17S, R17E	
Corral	T17S, R18E	
Kadmon	T17S, R18E	apparently a stop along Southern Pacific Railroad
Kane	T17S, R18E	
O'Leary	T17S, R18E	
Shanklin	T17S, R18E	
Wetstone [*sic*] Ranch	T17S, R18E	
Tecolote	T18S, R2E	
Dowling	T18S, R5W	
Topowa	T18S, R5E	
G. T. Martin	T18S, R8E	
Leon	T18S, R8E	
Otero	T18S, R8E	
Redondo	T18S, R8E	
Poso Buena	T18S, R9E	
Oury	T18S, R11E	
Quiroz	T18S, R12E	
A. Morales	T18S, R13E	
Canoa land claim	T18S, R13E	Spanish land grant; 10.5 miles NE/SW by 2.75 miles NW/SE

Table 2 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Township and Range

Property Name	Location	Comments
Chaves	T18S, R13E	
New Ranch	T18S, R13E	
S. E. Brown	T18S, R13E	
Buckalew	T18S, R15E	
Columbia Camp	T18S, R15E	
Frijole Camp	T18S, R15E	
Omboa smelter	T18S, R15E	
Stone	T18S, R15E	
Blue Jay	T18S, R16E	
Chapo	T18S, R16E	
McClary	T18S, R16E	
Schofield	T18S, R16E	
VR Ranch	T18S, R16E	
Old station	T18S, R17E	
Sanfords	T18S, R17E	
Stone Cabin	T18S, R17E	
Total Wreck	T18S, R17E	
Kinnear	T18S, R18E	
Wakefield	T18S, R18E	
Charco's	T19S, R1W	
Indian village	T19S, R1W	
Indian village	T19S, R6E	
Colorado	T19S, R7E	
Sycamore	T19S, R8E	
Espinosa	T19S, R9E	
Poso Nueva	T19S, R9E	
Tayler's	T19S, R9E	
Batamote	T19S, R11E	

Table 2 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Township and Range

Property Name	Location	Comments
Papago	T19S, R11E	
F. Elias	T19S, R12E	1 of 3 Elias properties within 1.75 miles of each other
J. Elias	T19S, R12E	1 of 3 Elias properties within 1.75 miles of each other
T. Elias	T19S, R12E	1 of 3 Elias properties within 1.75 miles of each other
Canoa	T19S, R13E	
Junction	T19S, R13E	
Ortiz	T19S, R13E	
Stage station	T19S, R13E	
Valdez	T19S, R13E	
Dowdle	T19S, R14E	
White House	T19S, R14E	
Proctor	T19S, R15E	
Aliso	T19S, R16E	
Fish	T19S, R16E	
Greaterville	T19S, R16E	town
Steele	T19S, R16E	
Young	T19S, R16E	
Cottonwood	T19S, R17E	
Empire Ranch	T19S, R17E	
Indian village	T20S, R4E	
La Ventana Ranch	T20S, R5E	
Well	T20S, R5E	probably associated with La Ventana Ranch
Boboquivari Camp	T20S, R7E	
Raney's Camp	T20S, R7E	
Jones	T20S, R8E	
Centenial [*sic*] Camp	T20S, R9E	

Table 2 (continued). Cultural Resource Sites on the 1893 Roskruge Map, Sorted by Township and Range

Property Name	Location	Comments
Martinez	T20S, R9E	
Ruis	T20S, R9E	
Secundino	T20S, R9E	
Solid Security Camp	T20S, R9E	
Clark	T20S, R10E	
Lead Carbonate Wonder Camp	T20S, R10E	
Rancho Seco	T20S, R10E	
Robledos	T20S, R10E	
Atondo	T20S, R11E	
Bustemente	T20S, R11E	
Moyza	T20S, R11E	
Ramires	T20S, R11E	
San Miguel	T21S, R5E	
Alamo	T21S, R7E	
Aros	T21S, R7E
