

# Election Night Reporting

## Quick Start Guide

The Election Night Reporting (ENR) display provides extensive details on election results. Web visitors can view which candidates are leading for a contest as well as results by precinct and vote type (Polling Place, Early Ballots, and Provisional Ballots). There is a graphical display of the precincts that are currently reporting results and the candidate leading in each precinct as well as voter turnout by precinct. Reports can be downloaded in various formats and a custom filter allows for a refined search on results.

### When and how often will the results be updated?

Once the precinct polling locations have closed, the results are reported to the county. The county uploads results, and then begins reporting results to the public via the ENR tool. Updates occur throughout the night until all precincts have reported.

### Contest-Specific Results

For viewing contest-specific results by precinct, ENR has the functionality to view which candidate is receiving the most votes by precinct in a tabular display.
